Avenarius and the Standpoint of Pure Experience

BY

WENDELL T. BUSH, Ph.D.

Lecturer in Philosophy at Columbia University

“Bonne étude d'ensemble sur l'empirio-criticisme (la seule étude importante qui existe en langue anglaise sur ce sujet). L'auteur se rallie en général à ce système, mitigé par quelques thèses empruntées à la philosophie de James.” — *Revue de Métaphysique et de Morale*.

SPECIES AND VARIETIES: THEIR ORIGIN BY MUTATION

BY HUGO DE VRIES

Professor of Botany in the University of Amsterdam.

EDITED BY DANIEL TREMBLY MACDOUGAL

Assistant Director of the New York Botanical Garden.

Cloth, gilt top, xviii + 847 pages.

Price, postpaid, \$6.00 (21s)

“Prof. de Vries may well be regarded as the foremost advocate of experimental evolution, the man, moreover, who gave us the mutation theory of organic evolution. The volume before us is a splendid scientific plea for the experimental study of organic life.” — *Scientific American*.

“It will be seen that Professor de Vries has made an important contribution to science and thought. It is a masterly work and it is attractive because of the popular style in which the experiments are described and the conclusions stated. Every student of science will welcome it.” — *The Scotsman*, Edinburgh.
